## Project Objectives

### Business Friendly

Easier to do business with the State of Vermont

### Modernized Procurement

Built-in compliance and guided workflow

### Value Focused

Improved efficiency, transparency, and economies of scale

### Streamlined Process

- Increase efficiency through reengineering, modernizing and standardizing practices.
- Full electronic workflow from sourcing to payment.
- Single point of access for agencies and suppliers.

### New Technology

- Online shopping experience with catalog items linked to State contracts.
- Robust rules engine with baked in compliance for purchasing.
- Enhanced spend analytics capabilities.

### Transparent and Simplified Solicitations

- Develop, publish and award of solicitation opportunities all in one place.
- Build contracts from solicitations with electronic approvals.
- Supplier information securely shared across agencies.

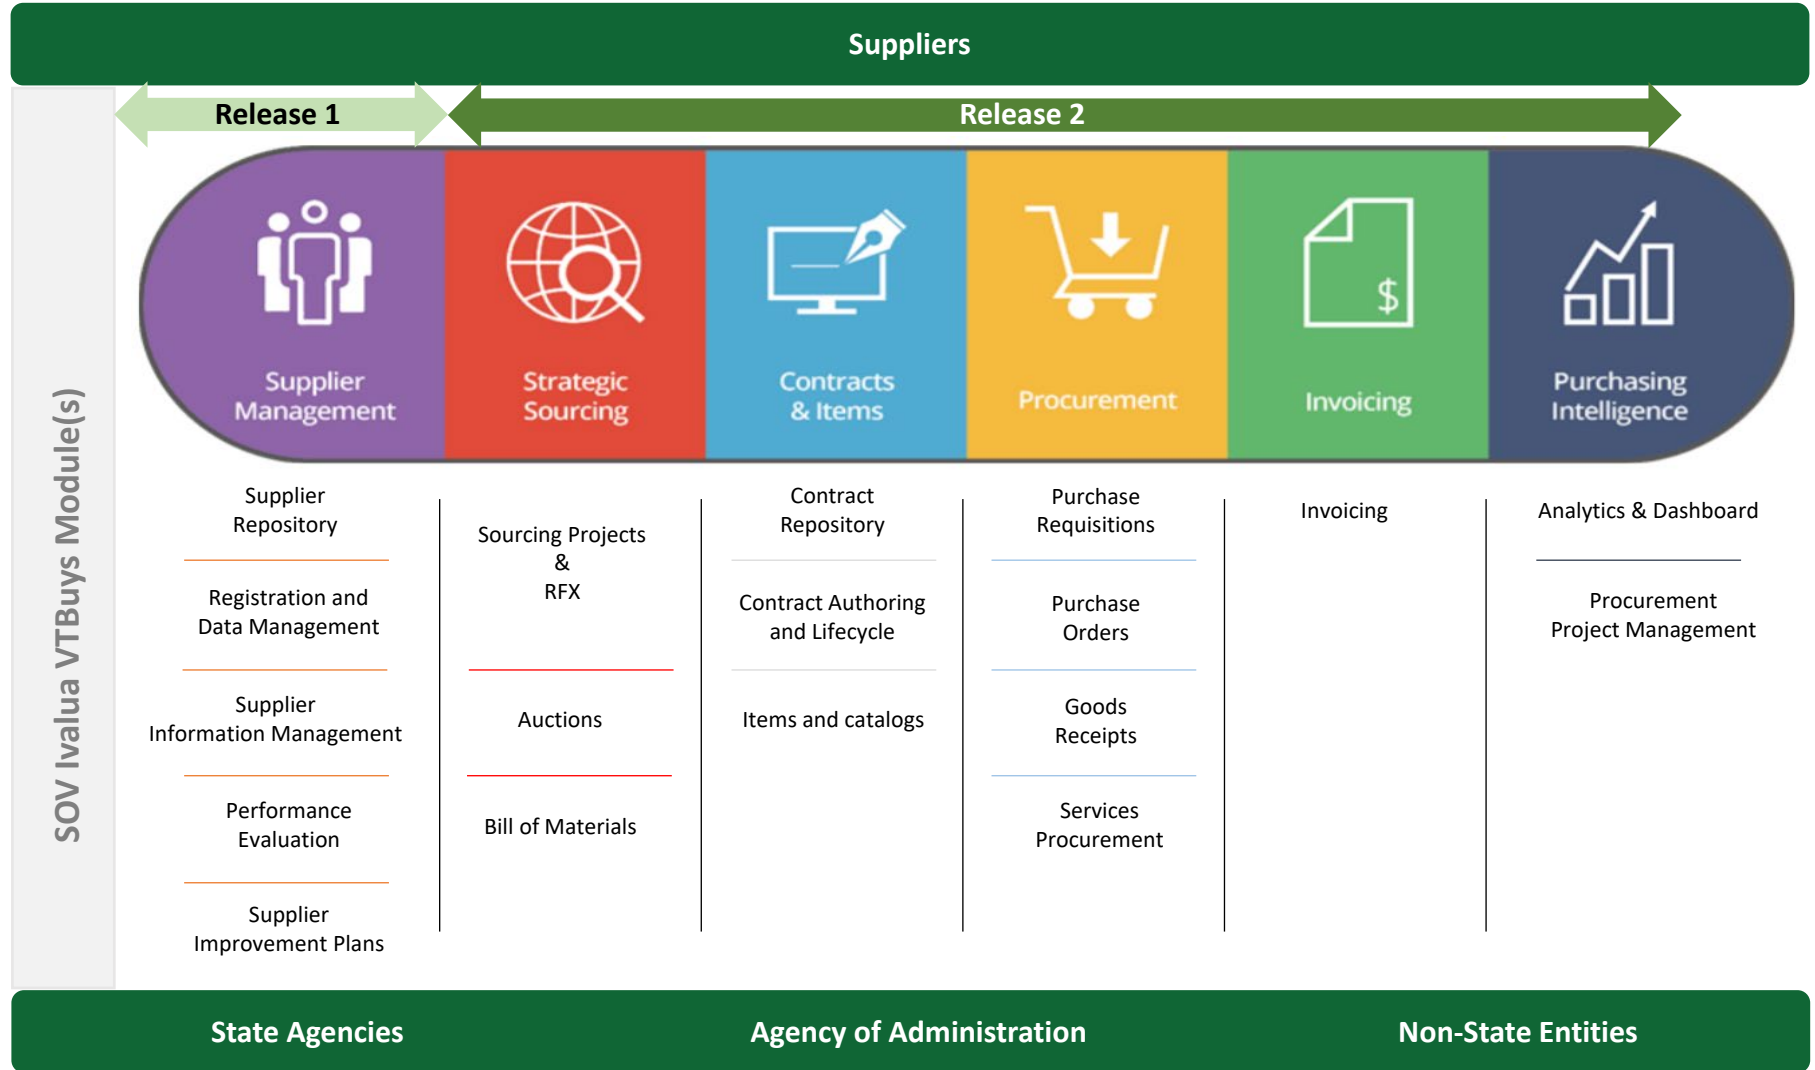

# VTBuys

## Why are we doing this project?

	Current State	Future State
 <b>Supplier Management</b>	Primarily paper-based environment for supplier's interaction with the State, accompanied by standalone systems / portals.	An integrated portal that is one stop for suppliers to do business with the State and provides access to all supplier-facing components.
 <b>Strategic Sourcing</b>	State Agencies and Department manually manage the bidding process.	Automated bidding process for both the State and suppliers for all types of solicitations, leveraging standard templates and libraries.
 <b>Contract &amp; Items</b>	State Agencies and Department manually manage the contracting process. The Office of Purchasing and Contracting manages an Access DB that contains certain contract metadata.	A single, central repository of all in-scope contracts. All contract processes are managed in one place, from negotiation, authoring, signature to renewal.
 <b>Procurement</b>	Purchase requests and orders are manually routed for approvals and submissions.	Catalog tied to contracts provides an on-line shopping experience, with automatic purchase request and order processing.
 <b>Invoicing</b>	Paper-based invoices are submitted by suppliers, with no visibility on approval progress.	Electronic invoices can be generated by suppliers, with visibility into invoice approval progress.
 <b>Purchasing Intelligence</b>	The process to pull data streams together from disparate manual processes and solutions / systems is time-consuming and prone to error.	Having all data in one place allows for robust data analytics and reporting to assess spend for more effective sourcing and contracting.

## Solution Overview

# VTBuys

How can suppliers leverage the new system?

#### INTEGRATION OPPORTUNITIES

- 1 Punch-out catalogs securely access supplier websites
- 2 Send POs electronically through cXML/EDI
- 3 Suppliers can send invoices electronically to the State through cXML/EDI

Suppliers can also create invoices by copying purchase orders

## System Preview

### Welcome to VTBuys eProcurement Portal

Welcome to the Group Purchasing Portal.

As part of optimizing purchasing processes and supply chain management, our group offers a dedicated tool for collaborative management of your purchases.

As the main tool for exchange between buyer and suppliers, the portal gives you the ability to access the life cycle of e-procurement, from the consultation phase (RFx) through the management of orders and deliveries, to the payment of invoices. It also allows suppliers to update their profile, catalogs and respond online to requests for proposal.

With this portal you will save time, have greater visibility and increase efficiency for the whole organization.
